**Subject:** F.J. Doyle Salvage Cleanup (905 N. Poplar and surrounding areas)  
**Attachments:** Figure 5-1 Sample Grid Results Map - Excavation Depths.pdf; Figure 5-1 Sample Grid Results Map - Total PCBs Breakout.pdf; LISD Access Agreement (DRAFT).pdf; FJDoyle\_20180919\_Table 1.pdf

Hello Mr. Maxwell:

I stopped by your office today and talked with Mr. Johnson and Mr. Campbell about the EPA Cleanup plans. Based upon our recent sampling effort, the cleanup does not include LISD property although that does not mean that we did not detect PCBs on LISD property. The EPA cleanup level for PCBs is 1 mg/kg. The areas on the LISD properties were less than that cleanup level. Attached are some documents related to the sampling effort.

1. Map which shows the location of PCBs found throughout the evaluation area;
2. Map which shows the location and proposed depths of excavation;
3. Table showing the analytical results for the EPA evaluation;
4. Request for access to use a portion of your parking lot to place a work trailer/generator/storage trailer

The EPA has made contact with the Texas Department of State Health Services (DSHS) through the Agency for Toxic Substances and Disease Registry (ATSDR). I will be talking with them and have them reach out to you to help craft a notification to the parents (especially those at the daycare) to explain any questions related to public health.

The EPA actions will involve the excavation of contaminated soils an off-site disposal at appropriate landfills followed by restoration of the properties with clean fill.

I will back in Leonard on Tuesday, September 25 meeting with my contractor to discuss the project and begin the cleanup planning process. We are trying to get started on the project at the end of October or the beginning of November.

If you have any questions, please do not hesitate to contact me.
